

TRAINING AND/OR NOTIFICATION PRIOR TO WORKING WITH ASBESTOS

All new buildings and grounds employees will participate in a 2-hour training to orient them to the existence of asbestos in the buildings to which they are attached and to address appropriate concerns relative to direct contact with asbestos. This training must occur within 60 days. These individuals will not be authorized to touch, amend or in any other pattern directly respond to asbestos bearing building products. Any employee who is required to repair or work with asbestos-containing material will be fully trained prior to work assignment.

All short-term workers, employees or contractors who may enter the building for a period of time will be notified to the extent possible as to the availability of the plan identifying asbestos-bearing materials.
