

REMODELING, RENOVATION, NEW CONSTRUCTION ABATEMENT PROCEDURES

All specifications for removal, encapsulation, encasement or extraordinary operations and maintenance programming involving asbestos will be developed in a specification format suggested by the National Institute of Building Sciences (NIBS) or other organization with appropriate background or experience in hazardous waste specification development, and approved by the Asbestos Program Manager. Federally certified project designers will be used in developing all projects.

Any project within the Coon Rapids-Bayard Community School District designated for renovation/remodeling will be referred for review and approval to the office of the Asbestos Program Manager. It will be the Manager's responsibility to review construction specifications and plans and establish guidelines wherein, should these activities potentially cause or promote contamination, appropriate procedures can be readily followed to preclude contamination.

Before a new or newly acquired building is utilized for any purpose within the District, there will be formal written assurance by the Asbestos Program Manager that appropriate public health and compliance procedures have occurred relative to the building.
